# ASHANDI LEONADI

Software Fullstack Engineer

Jakarta, Indonesia, 13430
ashandileonadi@gmail.com • +62 852 1639 8875 • ashandileonadi.vercel.app

Software Fullstack Engineer with 5+ years of experience building modern web and mobile applications — from AI-powered features (OpenAI integration, RAG with vector search) to offline-first architectures and real-time systems. Proficient across the full stack with React.js/Next.js, Laravel, Supabase, and TypeScript, with a strong focus on delivering intelligent, production-ready solutions that leverage LLMs, automated document generation, and conversational AI.

---

## PROFESSIONAL EXPERIENCES

**MapTrack — Remote, Full-time** Oct 2024 – Present
Product Software Engineer (Fullstack)

Next.js · TypeScript · Supabase · OpenAI

- Built an OpenAI-powered PDF generation system for custom forms, enabling dynamic form creation, intelligent content structuring, and automated document output — reducing manual form preparation time significantly.
- Refactored the data layer using TanStack DB to support an offline-first architecture, improving reliability and user experience in low-connectivity field environments.
- Developed GPS battery monitoring and device status indicators backed by Amazon DynamoDB, enhancing real-time fleet visibility and device reliability for asset tracking operations.
- Designed and implemented an interactive asset map with marker collision handling, filter integration, and a detail drawer for streamlined fleet management workflows.

**Happy5 — Remote, Full-time** Mar 2021 – Dec 2025
Frontend Web/Mobile Engineer

- Led frontend code reviews and mentored intern engineers, improving code quality standards and accelerating onboarding for new team members.
- Migrated legacy JavaScript codebases to TypeScript across multiple modules, reducing runtime errors and improving long-term maintainability.
- Translated Figma mockups and wireframes into pixel-accurate, interactive web pages using React.js, Tailwind CSS, and TypeScript.
- Implemented end-to-end testing with Cypress, increasing test coverage and reducing regression bugs in production releases.
- Built and documented a reusable component library with Storybook, enabling faster feature development and design consistency across teams.
- Managed Amplitude analytics integration, providing data-driven insights into user engagement and feature adoption.
- Developed the Happy5 Culture mobile application using React Native with Tailwind CSS, delivering a consistent cross-platform design system.

**Kodegiri — Remote, Freelance** Mar 2024 – Jun 2024
Frontend Web Engineer

- Revamped the VRMS web application with a modernized UI and new feature set using React.js, Ant Design, and Tailwind CSS.
- Migrated the existing JavaScript codebase to TypeScript, improving type safety and developer experience.

**Rakamin Academy — Remote, Freelance** Mar 2022 – Apr 2022

Frontend Web Engineer

- Implemented UI designs into production-ready React components, integrating with backend services via React Query for optimized data fetching and state management.
- Styled the application using Styled Components, ensuring consistent and maintainable theming across all pages.

**Smarteschool — Remote, Freelance** Jul 2021 – Feb 2022

Frontend Web Engineer

- Developed new features and revamped legacy pages in a Next.js application, improving performance and aligning the platform with modern UX standards.
- Created reusable API utility functions and conducted code reviews to maintain high code quality and promote consistency across the team.

**Happy5 — Remote, Intern** May 2020 – Mar 2021

Frontend Web Engineer

- Built a PDF document generation feature for formal review results using @react-pdf/renderer, streamlining the performance review export process.
- Wrote end-to-end tests with Cypress and resolved bugs to improve application stability ahead of production releases.
- Integrated frontend components with backend services, ensuring seamless data flow for core HR features.

## TECHNICAL SKILLS

React Next.js TypeScript JavaScript Tailwind CSS Supabase TanStack Query Redux
OpenAI Ionic Capacitor Cypress Storybook Figma Git Laravel Inertia.js PHP SQLite
Shadcn Mistral AI React Hook Form Zod

## PROJECT EXPERIENCE

**MapTrack**
Full-stack GPS tracking and fleet management platform featuring AI-powered PDF generation via OpenAI, offline-first architecture with TanStack DB, and real-time GPS battery monitoring backed by Amazon DynamoDB.
Next.js · TypeScript · Supabase · OpenAI

**Shopbot Assistant**
AI-powered WhatsApp chatbot for e-commerce shops, leveraging RAG with Supabase Vector Search to deliver context-aware product recommendations and customer support at scale.
Next.js · Supabase · OpenAI · WhatsApp Cloud API

**Expense Tracker**
Full-stack personal finance application with spending categorization and data visualization. Features server-driven UI with Inertia.js for SPA-like performance.
Laravel · Inertia.js · React.js · SQLite · Shadcn UI

**Happy5 Performance**
Enterprise platform for managing OKRs, project tracking, and performance reviews, serving multiple organizations with role-based access.
Ruby on Rails · PostgreSQL · React.js

**Stoqu Inamawangi**
High-performance inventory and order management system for real-time stock tracking and customer order processing.
Go · React.js/Next.js

**Smarteschool**
School digitization platform covering e-learning, facility management, and administrative operations — designed to modernize the teaching and learning ecosystem.

Adonis.js · React.js/Next.js

## EDUCATION

**Binus Online Learning, Indonesia** 2022 – 2026
Bachelor of Information Systems (GPA 3.71)

**Vocational High School 26 Jakarta, Indonesia** 2017 – 2021
Network Informatics Systems and Applications
