---

Software Fullstack Engineer with **5+ years of experience** building modern web and mobile applications — from **AI-powered features** (OpenAI integration, RAG with vector search) to **offline-first architectures** and **real-time systems**. Proficient across the full stack with **React.js/Next.js, Laravel, Supabase, and TypeScript**, with a strong focus on delivering intelligent, production-ready solutions that leverage **LLMs, automated document generation, and conversational AI**.

PROFESSIONAL EXPERIENCES

MapTrack — Remote, Full-time
Product Software Engineer (Fullstack) | Next.js | TypeScript | Supabase | OpenAI
Jan 2025 – Present

- Integrated OpenAI-powered PDF generation for custom forms, enabling dynamic form creation, intelligent content structuring, and automated document generation.
- Refactored the data layer using TanStack DB to support an offline-first architecture, improving reliability and user experience in low-connectivity environments.
- Implemented enhancements for GPS battery monitoring and status indicators backed by Amazon DynamoDB, improving real-time visibility, scalability, and device reliability.

Happy5 — Remote, Full-time
Frontend Web/Mobile Engineer
Mar 2021 – Dec 2025

- Conducted thorough code reviews, optimizing overall performance.
- Successfully refactored JavaScript codebases into TypeScript, ensuring improved efficiency and maintainability.
- Converted designs from the design team (mockups, wireframes) into interactive web pages using HTML, Tailwind CSS, and JavaScript/TypeScript.
- Implemented end-to-end testing using Cypress, enhancing the reliability of the application.
- Designed reusable components and meticulously documented them with Storybook, facilitating easier development and collaboration.
- Successfully guided new intern engineers in developing features and resolving bugs.
- Managed Amplitude analytics integration, providing valuable insights into user behavior.
- Built Happy5 Culture application using React Native, enhancing performance and code maintainability.
- Set up Tailwind CSS within the mobile application framework, streamlining the styling process and ensuring a consistent design system.

Kodegiri — Remote, Freelance
Frontend Web Engineer
Mar 2024 – Jun 2024

- Successfully revamped the VRMS web application with a new design and additional features using React.js.
- Styled components using Tailwind CSS.
- Utilized Ant Design as the base component library.
- Successfully refactored JavaScript codebases into TypeScript, ensuring improved efficiency and maintainability.

Rakamin Academy — Remote, Freelance

Frontend Web Engineer

Mar 2022 – Apr 2022

- Enhanced features to improve user experience and functionality.
- Implemented designs into React components, ensuring a seamless transition from mockups to code.
- Integrated the application with backend services, enabling dynamic and interactive features.
- Consumed backend endpoints using React Query, optimizing data fetching and state management.
- Styled React components using the Styled Components library, ensuring consistent and maintainable styling across the application.

Smarteschool — Remote, Freelance

Frontend Web Engineer

Jul 2021 – Feb 2022

- Developed new features using Next.js.
- Utilized Bootstrap as the CSS framework, ensuring a responsive and aesthetically pleasing design.
- Created reusable functions to efficiently consume backend endpoints, promoting code reusability and maintainability.
- Conducted thorough code reviews, ensuring high code quality.
- Implemented design specifications into React components, translating visual designs into interactive elements.
- Revamped outdated pages, improving their performance, design, and functionality to meet modern standards.

Happy5 — Remote, Intern

Frontend Web Engineer

May 2020 – Mar 2021

- Successfully developed formal review results using @react-pdf/renderer, enabling the generation of PDF documents within the application.
- Implemented end-to-end testing using Cypress, enhancing the reliability of the application.
- Identified and fixed bugs, as well as implemented improvements to ensure the application's stability and performance.
- Integrated the application with backend services, ensuring seamless communication and data flow between frontend and backend.

TECHNICAL SKILLS

React | Next.js | TypeScript | JavaScript | Tailwind CSS | Supabase | TanStack Query | Redux | OpenAI | Ionic Capacitor | Cypress | Storybook | Figma | Git | Laravel | Inertia.js | PHP | SQLite | Shadcn | Mistral AI | React Hook Form | Zod

PROJECT EXPERIENCE

MapTrack
Full-stack GPS tracking and fleet management platform featuring AI-powered PDF generation via OpenAI for dynamic custom forms, offline-first architecture with TanStack DB, and real-time GPS battery monitoring backed by Amazon DynamoDB. Built with **Next.js, TypeScript, Supabase, and OpenAI**.

Shopbot Assistant
AI-powered WhatsApp chatbot for e-commerce shops, leveraging RAG (Retrieval-Augmented Generation) with Supabase Vector Search to deliver context-aware product recommendations and customer support at scale. Built with **Next.js, Supabase, OpenAI, and WhatsApp Cloud API**.

Expense Tracker
Full-stack personal finance application with intuitive expense tracking, spending categorization, and data visualization. Features server-driven UI with Inertia.js for SPA-like performance without API complexity. Built with **Laravel, Inertia.js, React.js, SQLite, and Shadcn UI**.

Happy5 Performance
Full-stack enterprise platform for managing OKRs, project tracking, and performance reviews in a unified system, serving multiple organizations with role-based access. Built with **Ruby on Rails, PostgreSQL, and React.js**.

Catering Purchase and Delivery Management
End-to-end operations platform for a catering business, covering inventory management, procurement workflows, delivery scheduling, and automated billing. Built with **Spring Boot, PostgreSQL, and React.js/Next.js**.

Attendance Management
Full-stack HR platform handling attendance tracking, leave management, and payroll-ready attendance calculations, streamlining administrative workflows for enterprise use. Built with **Spring Boot, PostgreSQL, and React.js/Next.js**.

Stoqu Inamawangi
High-performance inventory and order management system for real-time stock tracking and customer order processing. Built with **Go and React.js/Next.js**.

Smarteschool
Comprehensive school digitization platform covering e-learning, facility management, and administrative operations — designed to modernize the entire teaching and learning ecosystem. Built with **Adonis.js and React.js/Next.js**.

EDUCATION

Binus Online Learning, Indonesia
Bachelor of Information Systems (GPA 3.71)
2022 – 2026

Vocational High School 26 Jakarta, Indonesia
Network Informatics Systems and Applications
2017 – 2021
