

ASHANDI LEONADI

Software Fullstack Engineer

Jakarta, Indonesia 13430

Email: ashandileonadi@gmail.com | Phone: +62 852 1639 8875 | Portfolio: ashandileonadi.vercel.app

PROFESSIONAL SUMMARY

Software Fullstack Engineer with over 5 years of experience building modern web and mobile applications. Specialized in AI-powered features including OpenAI integration, Retrieval-Augmented Generation (RAG) with vector search, offline-first architectures, and real-time systems. Proficient across the full stack using React.js, Next.js, Laravel, Supabase, and TypeScript, with a strong focus on delivering intelligent, production-ready solutions that leverage Large Language Models (LLMs), automated document generation, and conversational AI.

PROFESSIONAL EXPERIENCE

Product Software Engineer (Fullstack)

Oct 2024 – Present

MapTrack, Remote, Full-time

Next.js, TypeScript, Supabase, OpenAI

- Built an OpenAI-powered PDF generation system for custom forms, enabling dynamic form creation, intelligent content structuring, and automated document output, reducing manual form preparation time significantly.
- Refactored the data layer using TanStack DB to support an offline-first architecture, improving reliability and user experience in low-connectivity field environments.
- Developed GPS battery monitoring and device status indicators backed by Amazon DynamoDB, enhancing real-time fleet visibility and device reliability for asset tracking operations.
- Designed and implemented an interactive asset map with marker collision handling, filter integration, and a detail drawer for streamlined fleet management workflows.

Frontend Web and Mobile Engineer

Mar 2021 – Dec 2024

Happy5, Remote, Full-time

React.js, React Native, TypeScript, Tailwind CSS

- Led frontend code reviews and mentored intern engineers, improving code quality standards and accelerating onboarding for new team members.
- Migrated legacy JavaScript codebases to TypeScript across multiple modules, reducing runtime errors and improving long-term maintainability.
- Translated Figma mockups and wireframes into pixel-accurate, interactive web pages using React.js, Tailwind CSS, and TypeScript.
- Implemented end-to-end testing with Cypress, increasing test coverage and reducing regression bugs in production releases.
- Built and documented a reusable component library with Storybook, enabling faster feature development and design consistency across teams.
- Managed Amplitude analytics integration, providing data-driven insights into user engagement and feature adoption.
- Developed the Happy5 Culture mobile application using React Native with Tailwind CSS, delivering a consistent cross-platform design system.

Frontend Web Engineer

Mar 2024 – Jun 2024

Kodegiri, Remote, Freelance

React.js, Ant Design, Tailwind CSS, TypeScript

- Revamped the VRMS web application with a modernized UI and new feature set using React.js, Ant Design, and Tailwind CSS.
- Migrated the existing JavaScript codebase to TypeScript, improving type safety and developer experience.

Frontend Web Engineer

Mar 2022 – Apr 2022

Rakamin Academy, Remote, Freelance

React.js, React Query, Styled Components

- Implemented UI designs into production-ready React components, integrating with backend services via React Query for optimized data fetching and state management.
- Styled the application using Styled Components, ensuring consistent and maintainable theming across all pages.

Frontend Web Engineer

Jul 2021 – Feb 2022

Smarteschool, Remote, Freelance

Next.js, React.js

- Developed new features and revamped legacy pages in a Next.js application, improving performance and aligning the platform with modern UX standards.
- Created reusable API utility functions and conducted code reviews to maintain high code quality and promote consistency across the team.

Frontend Web Engineer (Intern)

May 2020 – Mar 2021

Happy5, Remote, Internship

React.js, Cypress, @react-pdf/renderer

- Built a PDF document generation feature for formal review results using @react-pdf/renderer, streamlining the performance review export process.
- Wrote end-to-end tests with Cypress and resolved bugs to improve application stability ahead of production releases.
- Integrated frontend components with backend services, ensuring seamless data flow for core HR features.

TECHNICAL SKILLS

Languages: TypeScript, JavaScript, PHP, SQL

Frontend: React.js, Next.js, React Native, Ionic Capacitor, Tailwind CSS, Shadcn UI, Ant Design, Styled Components, React Hook Form, Zod

Backend and Database: Laravel, Inertia.js, Supabase, SQLite, Amazon DynamoDB, PostgreSQL

State and Data Management: TanStack Query, TanStack DB, Redux, React Query

AI and Machine Learning: OpenAI API, Mistral AI, Retrieval-Augmented Generation (RAG), Vector Search

Testing and Tools: Cypress, Storybook, Git, Figma, Amplitude

PROJECT EXPERIENCE

MapTrack

Tech Stack: Next.js, TypeScript, Supabase, OpenAI

Full-stack GPS tracking and fleet management platform featuring AI-powered PDF generation via OpenAI, offline-first architecture with TanStack DB, and real-time GPS battery monitoring backed by Amazon DynamoDB.

Shopbot Assistant

Tech Stack: Next.js, Supabase, OpenAI, WhatsApp Cloud API

AI-powered WhatsApp chatbot for e-commerce shops, leveraging Retrieval-Augmented Generation (RAG) with Supabase Vector Search to deliver context-aware product recommendations and customer support at scale.

Expense Tracker

Tech Stack: Laravel, Inertia.js, React.js, SQLite, Shadcn UI

Full-stack personal finance application with spending categorization and data visualization, featuring server-driven UI with Inertia.js for SPA-like performance.

Happy5 Performance

Tech Stack: Ruby on Rails, PostgreSQL, React.js

Enterprise platform for managing Objectives and Key Results (OKRs), project tracking, and performance reviews, serving multiple organizations with role-based access control.

Stoqu Inamawangi

Tech Stack: Go, React.js, Next.js

High-performance inventory and order management system for real-time stock tracking and customer order processing.

Smarteschool

Tech Stack: Adonis.js, React.js, Next.js

School digitization platform covering e-learning, facility management, and administrative operations, designed to modernize the teaching and learning ecosystem.

EDUCATION

Bachelor of Information Systems

Binus Online Learning, Indonesia

2022 – 2026

GPA: 3.71 / 4.00

Network Informatics Systems and Applications

Vocational High School 26 Jakarta, Indonesia

2017 – 2021
